I started DripDrop to save lives…

Dehydration is a global issue and the 2nd leading cause of death for children under five. Incredibly, that rate plummets to less than 1% with the use of Oral Rehydration Solution. But taste matters. And for decades, the palatability of traditional ORS has been a barrier to use, resulting in unnecessary loss of life.

So I set out to develop a better solution, keeping two standards top of mind:

1) It had to work.
2) It had to taste good.

The result was DripDrop—a game-changing formula that improves upon the rigorous ORS standards set forth by the World Health Organization. Fast. Efficacious. And delicious. So the people who need it want to drink it.

Today, we continue this mission to defeat life-threatening dehydration at home and abroad. Empowering in-crisis and underserved communities with a powerful, cost-effective, accessible tool when IV therapy and hospitalization aren’t options.

We aim to reach as many people as possible. So in 2022, we worked harder than ever to expand our partner networks across our three focus pillars: children, firefighters, and humanitarian aid.

Our hope is to inspire others worldwide to participate in similar creative partnerships, finding innovative solutions to problems that meet people’s healthcare needs. That’s what DripDrop is all about.

And perhaps most exciting of all, in 2022, we committed to our biggest donation goal yet, working with our strategic partners to get over 2 million servings of DripDrop to people in need of dehydration relief around the globe.

This is what’s so exciting about our company. We have a product that is all about helping people feel better and saving lives. That’s what keeps us inspired and why we do what we do.

Our thanks to everyone who makes this possible.

Dr. Dolhun

Dr. Andrew Dolhun
At the end of the day, DripDrop is about improving health and saving lives. It’s a challenge, but it’s also very inspirational to me at the same time.

That’s why I get up in the morning with a smile on my face.

Dr. Dolhun
Our mission is core to who we are and what we do. *But we don’t do it alone.*

### OUR PURPOSE

DripDrop is a Public Benefit Company, meaning we’re committed to the greater good, not the bottom line. It’s how we believe all business should be done, and we’re proud to be a PBC alongside other brands we admire.

### OUR MISSION

As a PBC, we remain unwaveringly committed to our mission of defeating life-threatening dehydration at home and abroad by giving hands-on support and product donations to people facing life-threatening dehydration, focusing on three primary impact areas: Children, Humanitarian Aid, and Firefighters.

### OUR PARTNERS

We collaborate with best-in-class organizations to ensure our product isn’t just sitting on a tarmac somewhere. It’s all about that last 100 miles; partnering with those who are nimble and reactive, to quickly get relief to people in crisis.

With the help of our amazing partners, in 2022 we’ve successfully delivered 2 million servings of DripDrop to communities in need. At the edge of a wildfire, in a remote village, after a hurricane destroyed a local medical facilities—that’s where we show up with DripDrop and save lives.
Who We Partner
With Matters

With Global Empowerment Mission, we help communities affected by natural disasters by supplying DripDrop within family necessity kits and providing much-needed relief to rescue workers.

With the National Volunteer Fire Council, we help reduce heat injuries and optimize operational readiness for wildland firefighters exposed to dehydrating conditions.

With Heart to Heart International, we help in providing resources to people in crisis, and supplying clinics and medical facilities globally.

With Feed the Children, we support their efforts to deliver emergency aid to those affected by natural disasters, in addition to helping them provide food and resources to children and families in need.

With the Foundation For International Medical Relief of Children, we help provide clinical care and relief from widespread dehydration caused by infectious diseases to many living below the poverty line.

For Humanitarian Aid

During natural disasters, infrastructure gets damaged, leading to water shortages and limited access to medical supplies—particularly IVs. That is precisely when a sophisticated yet simple technology like DripDrop is so valuable. Where we can help decrease costs, improve healthcare outcomes, and save lives.
Through our partnerships with **Global Empowerment Mission**, **Heart to Heart International**, and **The Salvation Army**, we delivered DripDrop to those facing dangerous dehydration due to the ravages of natural disaster, war, and health crises, like in:

<th>ARIZONA, NEVADA</th>
<th>KENTUCKY</th>
<th>FLORIDA, THE CARIBBEAN</th>
<th>HAITI</th>
</tr>
</thead>
<tbody>
<tr>
<td>Arizona and Nevada, where emergency-heat-relief cooling centers helped those struggling during deadly summer heat spikes.</td>
<td>Kentucky, where flash flooding and tornadoes trapped thousands inside their homes, compromised water sources, and left many in need of medical attention.</td>
<td>Florida and the Caribbean, where powerful hurricanes unleashed a vicious combination of winds, rain, and storm surges, causing devastating loss of life, ongoing flooding, downed power lines, and impassable roads. Leaving millions without power or clean water.</td>
<td>Haiti, where after nearly three years with no reported cases, a cholera outbreak threatened lives again due to poor water and sanitation issues.</td>
</tr>
</tbody>
</table>
“Dehydration is universal. Because humans can only live a few days without proper hydration, it’s the most important intervention for populations that have been devastated by natural disasters.

Dr. Dolhun
Due to the invasion of Ukraine, a humanitarian crisis has unfolded, as food, clean water, and medical supplies run extremely low. Millions have been displaced as attacks on residential areas, and hospitals ramp up. Many are injured and need aid as they seek refuge in bordering countries.
Mission Trip
Ukraine

100LBS OF MEDICAL EQUIPMENT

On a five-day Mission trip, Dr. Dolhun and his team successfully delivered **thousands of servings of DripDrop and 100lbs of medical equipment**, with the majority of this aid going directly to supply a hospital outside of Mariupol, which had been bombed but was still treating patients in the basement.

600K SERVINGS

We donated **over 600k servings** of DripDrop to our boots-on-the-ground partners, Global Empowerment Mission and Heart to Heart International, for distribution to clinics across Ukraine and inclusion in vital necessity kits for refugees.

CONTINUED COMMITMENT

In October, Dr. Dolhun returned to Lviv, to continue the work he began last March. He met with doctors and other Ukrainians across the city, delivering **dehydration relief and medical supplies** to those affected by the war.
“

Just showing up matters. The psychological support we can provide will be critical to helping Ukrainians weather the winter.

DripDrop is helping. Thank You!

Dr. Dolhun
The past decade was the hottest on record. And that’s meant heat-related illnesses (and even deaths) are on the rise. In fact, more than 65,000 Americans visited an emergency room for acute heat illness during the summer. And extreme heat became the #1 weather-related cause of death in the US. Especially in hot places like Phoenix, Arizona and Las Vegas, Nevada.

We partnered with the Salvation Army and Phoenix Rescue Mission to get life-saving DripDrop to those needing critical dehydration relief during dangerous temperature spikes across the state.
Diseases caused by poor sanitation and limited access to clean drinking water make dehydration a leading cause of morbidity and mortality for infants and young children worldwide. At DripDrop, we cannot rest knowing treatable dehydration is threatening these young lives.
With DripDrop, we empower families with an easy-to-use, safe, and highly effective alternative when IV therapy and hospitalization aren’t an option. That’s a win-win for everyone.

**RED CROSS**
We partnered with the Red Cross to treat patients and provide hydration education to those living in remote areas of Mexico.

**FEED THE CHILDREN**
We forged a new partnership with Feed the Children, supplying DripDrop to be distributed in their disaster response boxes.

**FIMRC**
We ran a donation campaign for the Foundation For International Medical Relief of Children (FIMRC), helping fund their clinics providing healthcare for low-resource and medically underserved families in some of the most challenged communities worldwide.
Children are our future. With DripDrop, not only can we prevent kids from dying, we can play an important role in ensuring the poorest children get the best chance at an education—which is the great equalizer.

Dr. Dolhun
This year, Dr. Dolhun and his team traveled back to Campeche, Mexico, continuing the work he started with the Red Cross. The trip took them to rural villages across the region, where unclean water, water-borne diseases, and extreme heat make dehydration a life-threatening problem—especially for children.

Our team spent time building relationships with local people: providing medical treatment and delivering dehydration relief to the community.

Additionally, through this partnership, we’ve been able to mobilize a local doctor, Dr. Karla, to come back every three weeks to offer primary medical care to the community dealing with high cholesterol, hypertension, and diabetes.
For Firefighters

Firefighters face life-threatening dehydration and heat related illness on any given day. We believe dehydration should never inhibit a firefighter’s ability to get the job done or compromise their personal safety.
With wildfire incidents on the rise, we’re more determined than ever to **support threatened communities** and the **heroic firefighters** risking life and limb to keep them safe.

For the 3rd year strong, we partnered with National Volunteer Fire Council—a leading nonprofit offering critical resources, education, and advocacy for first responders across the nation.

Across our three-year partnership, we’ve gotten 1.2 million donated servings of DripDrop to wildland crews across the US.

Not only were we able to provide critical relief to these brave men and women facing unique risks of dehydration and heat injuries, we also hit a donation milestone!

We’re honored to work with NVFC. Together we’ll continue bringing relief to these tireless heroes who give so much of themselves, keeping us and our precious wildlands safe.
Hydration is key to keeping our responders healthy and performing at their best—especially during prolonged incidents and excessive summer heat!

Thank you for supporting our firefighters with DripDrop donations.

Schell-Vista Fire Station
We keep DripDrop on our rigs so members have ready access to dehydration relief during extreme heat and strenuous activity so we can perform at our best!

Thanks for supporting volunteer firefighters.

PAN-MASS CHALLENGE
50,000+ servings

To provide support for the families of injured soldiers on Veterans Day, we participated in a stick for stick donation program with this organization, reuniting loved ones in their time of need.

In an effort to bring both comfort and relief to active-duty service members, we donated DripDrop throughout the year to help supply "Boxes of Home" sent to deployed US Military serving overseas.

We donated to organizations providing medical support and supply kits those living without homes in cities like Atlanta, Kenosha, Tampa, Los Angeles, Phoenix, Pittsburgh and Michigan.

We provided donations to support their humanitarian aid efforts on the U.S./Mexico border, helping improve the health and safety of our asylum-seekers.

For the 3rd year strong, we donated to support riders and volunteers at this event, which helped raise over $69 million for cancer research and treatment at Dana-Farber Cancer Institute.
If we can save the lives of the most vulnerable human beings, we can save and improve the lives of every human being.

Dr. Dolhun
The number of countries DripDrop has reached around the world, helping millions of individuals globally.
Our impact keeps growing...

As a Public Benefit Company, serving the greater good is rooted in our DNA, and giving back is why we exist. That’s why we’re so excited to announce that in 2023, we’re setting our biggest donation goal yet:
